HTML form interface

The screenshot shows a web browser window displaying the QuickServe login page. The page has a dark blue header with the 'QuickServe' logo on the left and an 'Account' dropdown menu on the right. The main content area has a yellow background. In the center, there is a white login card. At the top of the card is a coffee cup icon, followed by the text 'Welcome Back!' and 'Login to your QuickServe account'. Below this are two input fields: 'Email Address' with a placeholder 'Enter your email' and 'Password' with a placeholder 'Enter your password'. There is a 'Remember me' checkbox and a 'Forgot Password?' link. A large orange 'Login' button is at the bottom of the card. Below the button, there is a link: 'Don't have an account? Create one now'. The Windows taskbar is visible at the bottom of the browser window.

JS code used for API connection

```
27
28     try {
29         const response = await fetch('http://localhost:3000/api/auth/login', {
30             method: 'POST',
31             headers: { 'Content-Type': 'application/json' },
32             body: JSON.stringify({ email: identifier, password })
33         });
```

```
37
38     try {
39         const response = await fetch('http://localhost:3000/api/users', {
40             method: 'POST',
41             headers: { 'Content-Type': 'application/json' },
42             body: JSON.stringify({ name, username, email, password })
43         });
```

Github commits (frontend backend)

This screenshot shows a GitHub commit interface for the 'frontend' directory of a repository named 'final-project-Code-Buster-BSIT2b'. The commit was made by user 'gipzydee93' and contains the message 'Add all project files'. The commit date is '2e5e760 · 1 hour ago'. On the left, a file explorer shows the directory structure: 'main' (selected), 'backend', 'database', 'docs', 'frontend' (selected), 'css', 'img', and 'js'. The 'frontend' directory is expanded, showing files: 'admin.html', 'cart.html', 'dashboard.html', 'index.html', 'login.html', 'orders.html', 'product-details.html', 'products.html', 'profile.html', 'register.html', 'test.html', '.gitignore', and 'README.md'. The main area displays a table of files added in this commit.

Name	Last commit message	Last commit date
..		
css	Add all project files	1 hour ago
img/products	Add all project files	1 hour ago
js	Add all project files	1 hour ago
admin.html	Add all project files	1 hour ago
cart.html	Add all project files	1 hour ago
dashboard.html	Add all project files	1 hour ago
index.html	Add all project files	1 hour ago
login.html	Add all project files	1 hour ago
orders.html	Add all project files	1 hour ago
product-details.html	Add all project files	1 hour ago
products.html	Add all project files	1 hour ago
profile.html	Add all project files	1 hour ago
register.html	Add all project files	1 hour ago
test.html	Add all project files	1 hour ago

This screenshot shows a GitHub commit interface for the 'backend' directory of the same repository. The commit was made by user 'AJaden011' and contains the message 'Update start script to point to backend/server.js'. The commit date is 'c644390 · 3 minutes ago'. The file explorer on the left shows the 'backend' directory selected, with subdirectories 'config', 'controllers', 'middleware', 'models', 'routes', and 'uploads', and files 'README.md', 'package-lock.json', 'package.json', 'seed.js', and 'server.js'. The main area displays a table of files added in this commit.

Name	Last commit message	Last commit date
..		
config	Fix backend	39 minutes ago
controllers	Fix backend	39 minutes ago
middleware	Fix backend	39 minutes ago
models	Fix backend	39 minutes ago
routes	Fix backend	39 minutes ago
uploads	Fix backend	39 minutes ago
README.md	Fix backend	39 minutes ago
package-lock.json	Fix backend	39 minutes ago
package.json	Update start script to point to backend/server.js	3 minutes ago
seed.js	Fix backend	39 minutes ago
server.js	Fix backend	39 minutes ago

Below the table, there is a section for 'README.md' with a title 'User Management API - Backend'.

Short reflections

Frontend

In Phase 4, my tasks included capturing data from the form, validation of input, and POST requests to the backend API. The most difficult part was dealing with CORS errors that occurred when there was interaction between the frontend and the backend, which we sorted out using `app.use(cors())`. I also ensured that there was error handling and loading state in the submit buttons to help users understand whether their account is being registered or orders are in progress. At the end of Phase 4, we managed to send our form data successfully to MongoDB.

Backend

As the backend developer in our group, I was responsible for making sure the POST endpoints were working properly and that the system could return JSON responses correctly. This experience helped me improve my problem-solving and debugging skills while also teaching me the importance of teamwork in making the whole application function smoothly.

Database

As a database manager, I was responsible for creating an API using MongoDB to store and manage data efficiently. I used Mongoose to make database work easier by organizing the data into clear structures, making sure the data is correct, and linking related data together. This helped ensure that the system runs smoothly and that data can be accessed and managed properly.

Github

As the GitHub Manager, I was responsible for merging the frontend and backend branches and making sure all updates were properly pushed to the repository. This role helped me improve my teamwork and version control skills while keeping the project organized. I also learned the importance of clear commit logs and smooth collaboration with my group members.

Documentation

As the documentation officer, this task made me see how helpful a few clear screenshots and simple notes can be not just for keeping things organized, but for actually helping people do their jobs without getting stuck. I used to think documenting was just about writing stuff down, but now I realize it's more about putting yourself in someone else's shoes and making things easier for them.
